paolo.rossi@pucp.edu.pe

<https://linkedin.com/in/paolo-rossi-gonzales>

Engineer with +3 years of experience as a full stack developer building user-centric products and scalable microservices with **Typescript, Python and Go**. Aiming to contribute not only to building world-class software but also contributing to product/business ideas based on data. Open to work on new technologies, from AI to Blockchain; and different industries, big companies, and startups. Always looking to learn new things and apply them by building products.

EXPERIENCE

Truora, Software Engineer SSr — Nov 2022 - Present

- Develop and maintain the e2e Digital Identity product (user dashboard, document validations, face recognition, phone verifications, etc) and client support for API integration
 - Full-stack architecture planning and development of an in-house platform for reviewing images and documents
 - Monitoring and maintenance of microservices with tools such as Kibana and AWS Console
- Tech Stack:** Typescript, React, Vue, Go, Terraform, AWS.

Rappi,

Software Engineer — June 2022 - Nov 2022

- Awarded with a Golden Moustache for the successful deployment of a real-time app that provides order visibility.
 - Reduced latency by 20% on partner integrations through the monolith migration to a microservice architecture.
 - Documented old microservices managed by the team to improve future on-boardings.
 - Continuous delivery and deployment using Jenkins
- Tech Stack:** Typescript, React, Go, Postgres, Docker, Kafka.

BI & Data Analyst — July 2021 - June 2022

- Identified +300 new stores of current partners which are not integrated, driving +\$500K in incremental orders.
 - Automated process that modify stores coverage based on real-time KPIs, making it 5x faster.
 - Generated commercial and operations insights through analytics and data visualization for more than 50 cities.
 - Built data-pipelines, web scraping scripts, and dashboards.
- Tech Stack:** Python, Snowflake, SQL, PowerBI.

Clivi, Full Stack Developer — April 2021 - September 2021

- Increased conversion rate by 20% by implementing a payment gateway and allowing multiple payment methods.
 - Reduced funnel churn rate from 80% to 50%, optimizing the funnel with fewer steps and a more accessible UI.
 - Implemented the scrum methodology to increase the productivity of a team with 2 junior developers and 1 designer.
- Tech Stack:** React, Node JS, Firebase, Mercado Pago API.

PROJECTS

Serverless – <https://www.serverless.com/> - 2023

- Contribute to the Serverless Framework main lib and plugins, this is a command-line tool with an easy and approachable YAML syntax to deploy both your code and cloud infrastructure. **Tech Stack:** Javascript.

Autocomplete - Fig.io – <https://fig.io> - 2022

- Contributed to this Open Source Project with +120K stars and +300 contributors on Github. Build autocomplete specs for different CLI tools. **Tech Stack:** Typescript.

Spotiparty – <https://spotiparty.vercel.app> - 2022

- Start building a SaaS product to allow users to make karaoke and music streaming at parties a lot easier. **Tech Stack:** Next JS, Typescript, Prisma, tRPC, Tailwind CSS, MongoDB.

SKILLS

Programming Languages: Advanced: Javascript, Typescript, Python; Intermediate: Go.

Frameworks Tools: Advanced: React, Next JS; Intermediate: Vue, Nest JS, Echo; Basic: Django.

Data Base: Advanced: Postgres, MongoDB, DynamoDB; Intermediate: Redis, Firestore.

Tools: Docker, Jenkins, Terraform, Git, Vercel, AWS. **Languages:** Advanced: English; Native: Spanish.

EDUCATION

Pontificia Universidad Católica del Perú – Lima, Peru. *Bachelor of Science, Industrial Engineering, 2016 - 2020*

- Awarded a scholarship for high academic achievement.
- Graduated in the upper tenth.

CERTIFICATIONS

Advanced Program in Data Science & Global Skills – MIT & Aporta. 2022

Fullstack Bootcamp – Make It Real. 2022
